

# The Beauty of being more Productive.

It's a 100-Year Obsession.

# Beauty & the Best.

For over a century our family has been manufacturing turf equipment, bringing ingenuity to products that help superintendents create the most beautiful, playable golf courses possible. We're committed to designing products that will increase the productivity of your crew, help you achieve your agronomic goals and free up your time for other tasks.

*George & Scott Kinkead, President & Executive VP*

## CR-15 LARGE AREA TOPDRESSER & MATERIAL HANDLER

### Precise and Productive.

The new CR-15 combines unprecedented productivity and precision topdressing into one workhorse of a machine. Miscalculating a spread by five feet off the fairways can add up to 4 hopper loads or more.

- Onboard rate calculator lets you lock-in preferred rates and widths into four savable pre-sets
- Instantly adjust to heavier rates for landing zones or drainage areas
- Easily adjust spread widths while keeping the same rates, reducing material and overlapping spreads

# Torrent<sup>TM</sup> 2 DEBRIS BLOWER

Save up  
to 2 Hours  
per Day.

## DO THE MATH.

If your operator is even a few degrees off optimal blowing angle, they can waste hours a day. With Torrent 2, you have unprecedented control over air speed, air direction, noise management and fuel consumption at your fingertips.

You have to see this in action!

### DISTANCE EFFICIENCY

OPTIMAL BLOWING ANGLE  
with MAGNAPOINT TECHNOLOGY

100%

BLOWING ANGLE  
15° TOO LOW

69%

BLOWING ANGLE  
30° TOO LOW

52%

41% BLOWING ANGLE  
15° TOO HIGH

## ELIMINATE GUESSWORK

Patented MagnaPoint Technology lets you lock-in settings so your operator gets the most productive angle at every pass, from grass clippings and leaves to aeration cores.

## MAKE CREW MORE PRODUCTIVE

Torrent 2's powerful turbine generates superior air volume and velocity, along with super fast nozzle rotation, dramatically increasing operator productivity.

## TAKE CONTROL

Instantly access power when you want it, or drop down to idle when you don't. Patented instant Idle Down/Resume button saves on fuel consumption and reduces noise.

# WideSpin™ 1550 BROADCAST TOPDRESSER

Reduce up to  
720 Passes  
per Year.

## LOCK AND LOAD.

For the first time ever, you can set up and save your applications one time — then get your perfect spread every time. With Turfco's patented technologies, you can reduce greens passes, minimize turf traffic, and get a more consistent spread.

Schedule your product demo.

## BE MORE EFFICIENT

Turfco's patented WideSpin™ technology lets you complete even, edge-to-edge applications, without overlapping, to reduce passes and decrease traffic on your greens.

## CALCULATE AND LOCK-IN RATES

Know your application rates, calculate the rates you want, and determine how much material you need to budget — all for the first time ever with our on-board calculator.

## GET YOUR BEST SPREAD

Unique, adjustable spinner design lets you drive material down into the turf canopy to minimize brushing. Angle the spinner for the best spread whether material is wet or dry.

# TriWave<sup>TM</sup> 45 45-INCH OVERSEEDER

Achieve up  
to 30% Better  
Germination.

## YOUR FIRST RESPONDER IS HERE.

Repair, restore and renew the beauty of your course faster and with better results than ever before. It's easier to set up and hook up, with patented technology that maximizes seed-to-soil contact on all areas of your course.

Call us today at 800.679.8201

## JUST HOOK UP AND GO

Fast, easy hook-ups to any turf vehicle with no PTO required. Seeds while you turn so you can follow greens, collars and contours, hitting all your trouble spots in one trip.

## SEE GREENER RESULTS

Quick-adjust depth control allows you to set right seed depth. Together with WaveBlade technology and patented seed delivery, we deliver increased germination.

## ACHIEVE GREATER CONSISTENCY

Patented dual 18-inch floating heads follow the contours of the terrain for optimal seeding results so you don't miss the low spots or damage the high ones.
